Application areas

Disinfection of surfaces and equipment/devices in cleanrooms. Especially for Grade A and B clean areas, according to:

- EU Guidelines to Good Manufacturing Practice for medicinal products, Annex 1: Manufacture of sterile medicinal products; March 2009.
- FDA Guidance for Industry: Sterile drug products produced by aseptic processing - current good manufacturing practice, U.S. Department of Health and Human Services; Food and Drug Administration; September 2004.

Instructions for use

Please ensure compatibility of materials and instruments with peracetic acid.

Prepare the working solution by filling drinking quality water into a tub or bucket. Add the concentrate to the water and stir gently.

For example:

1 flask (40 ml) for 4 litre water (water + product) = 1 % solution.

Wipe the pre-cleaned surfaces until they are well wetted and observe required contact time.
